This is in response to Papers filed on 31 March 2004.

I. CORRECTION: On page 8, line 4 of the Office action mailed on 02 October 2003, Wu et al “(4,643,876)” is incorrect. It should be Wu et al ---(1 040 839)---.

II. Applicants urge that no new mater is added to the claims.

III. The following is an examiner's statement of reasons for allowance:

(1) Applicants urge that the processing steps using the materials and conditions in Examples 4 and 6 are specific, advantageous and patentable over the references on the record. It is agreed. Accordingly, the showing processes are allowable. However, the showings are much narrower than those as shown. In the absence of convincing evidence, it is assumed that the broadly claimed limitations in the process claims would be provided (about, -3 to +3%) the same stable results as those being tested and shown to be commensurate in scope with the showings.

(2) Wu et al (1 040 839) is closest prior art. Applicants urge that Wu et al fail to disclose, teach, suggest or cite the functional property of the material to be “stable” after sterilizing process as newly amended. In the absence of convincing evidence, it is assumed that the material is not stable after applying Wu et al sterilizing process as urged by applicants, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
